Tbilisi, Georgia

Georgian (Native) • English (B2+)

PROFESSIONAL SUMMARY

Motivated Computer Science student with hands-on experience in Python, SQL, and database systems (PostgreSQL, ScyllaDB). Strong foundation in data warehousing, ETL concepts, and software engineering workflows. Experienced in data validation, troubleshooting data issues, and documenting technical solutions. Eager to build scalable data pipelines and quickly develop expertise in PySpark, Microsoft Fabric, dbt, and cloud data engineering.

EDUCATION

B.Sc. Computer Science, Minor in Management | Kutaisi International University | 2023 – Present (4thYear)

- Full scholarship awarded for outstanding academic performance.
- Relevant Coursework: Database Design & SQL, Data Warehousing, Software Engineering, Linux Systems, Cloud Computing, Algorithms & Data Structures.
- **EPAM Data Software Engineering Program:** Python OOP, database design and modeling, OLAP/OLTP systems, and foundational data/AI concepts.
- Collaborative technical projects involving database design, implementation, testing, and presentation.

WORK EXPERIENCE

Sales Agent | RedHouse, Tbilisi | Jun – Sep 2025

Managed and updated property listings across multiple real estate platforms, ensuring accurate data, pricing, and details. Identified and resolved inconsistencies in property and client data to maintain database reliability. Coordinated workflows between clients, property owners, and internal teams, tracking progress and proactively resolving issues. Produced clear reports documenting client interactions, feedback, and resolution status.

Online Tutor – Mathematics & English | Self-Employed | 2023 – 2024

Assessed student needs and developed personalized learning plans to address core gaps in Mathematics and English. Communicated complex, technical concepts clearly to diverse audiences in English. Managed scheduling, session logistics, and client communication independently in a remote environment.

TECHNICAL SKILLS

- Programming: Python, SQL, Java
- Data Engineering: ETL, Data Pipelines, Data Transformation, Data Quality, Data Validation, Data Processing, Data Warehousing, Distributed Data Processing
- Databases: PostgreSQL, Microsoft SQL Server, SQLite, ScyllaDB, Relational Databases, NoSQL, Database Design, Data Modeling, OLTP/OLAP
- Data & Analytics: Pandas, NumPy, Scikit-learn, Analytical Reporting, Complex JOINS, Stored Procedures, Views, Triggers

- Engineering & Cloud: Git, GitHub, Docker, Linux, Version Control, CI/CD Fundamentals, Cloud Computing Concepts
 - Currently Learning: PySpark, Microsoft Fabric, dbt, Azure Data Engineering, Lakehouse & Medallion Architecture
-

TECHNICAL PROJECTS

Sports Club Management System | Database Course | 2024

- Designed and implemented a fully normalized database schema; identified and resolved a normalization flaw 48 hours before the final deadline, rebuilding affected stored procedures to pass all functional tests.
- Built stored procedures, views, and triggers for audit logging and systematic troubleshooting under tight deadlines.

University Examination System | Database Course | 2024

- Modeled relational data for results, roles, and schedules, implementing role-based views and access controls.
- Developed automated grade-computation procedures and analytical performance reports.

Water Research Database | Database Course | 2026

- Implemented data quality rules with triggers and atomic batch inserts using transaction control.
 - Developed complex cross-entity SQL JOIN queries for analytical reporting across related tables.
-

LEADERSHIP & ACTIVITIES

- **KIU Winter Festival:** Helped organize logistical workflows, coordinated participants, and managed deadlines.
- **KIU Mini Football Championship:** Assisted in organizing the tournament, managing team registrations, and scheduling match workflows.
